# TRUCEDAR® SEAMLESS COIL.

## Be Seamless.

Every home is unique, and seamless siding is designed to accommodate. With seamless siding, the custom cut, one piece installation fits your home perfectly. Because seamless has no splices, the results are well... seamless! The beauty of custom fitted seamless siding is immediate—providing a low-maintenance exterior that's designed to last.

- Seamless siding prevents water from infiltrating the outside layer which can cause mold and rot.

- TruCedar Kynar® paint system is superior at effectively reflecting the hot, harmful rays of the sun to prevent fading and forms a thick film barrier that provides resistance against wear and chips.

- Every square inch is protected by CarbonTech60™, a galvanization process that applies an anticorrosive zinc barrier to TruCedar seamless siding.
