Building Codes & Best Practices

SOFFIT

"Proper ventilation [more in-take through soffit than exhaust through roof vents] can lower the attic temperature by as much as 50°F, which significantly reduces the home's heating and cooling demands. Ridge and soffit vents help keep the attic space well-ventilated, preventing a build-up of moisture and reducing heat in summer. These vents can prolong the life of the roof."

Typical one foot soffit overhangs should have at least an 11 NFA, so when used on both sides of the home will have a combined NFA of 22 to draw the air flow needed to work with a ridge vent system.

SOFFIT & ACCESSORIES

TruVent® Hidden Vent Soffit in 518 Black [BLK]

The right Soffit changes everything.

Quality Edge has designed, engineered and patented some of the most attractive and best performing ventilation products in the industry. With proper ventilation, cool, dry air is drawn in through the soffit and replaces the hot moist air that is created in your attic.
