

TRUCEDAR®

STEEL SIDING

Alto, MI | TruCedar 6" Board & Batten in Ironstone

BUILD FOR A LIFETIME WITH TRUCEDAR® STEEL SIDING

Low maintenance. Fade resistance. Endless possibilities.

Make an impression without making a compromise. TruCedar® Steel Siding is available in several profiles including traditional lap, dutch lap, and board & batten. TruCedar delivers the design options you want with the embossed look to mimic actually wood siding, minus all the maintenance. Our siding resists fading, won't rot, peel or chip, so you can spend time relaxing and loving your home.

LOVE WHERE YOU LIVE

At Quality Edge® our product design team works hard to ensure TruCedar Steel Siding has the profiles, sizes, and colors to suit any home design. TruCedar offers 144 combinations of profiles and color for every type of home and style, from an urban oasis nestled in the city to a mountain estate. Whether your style is dark, light, or somewhere in-between, you can find it with TruCedar. Designed to showcase a residential or commercial project, create a look that makes a statement.

Holland, MI | TruCedar 10" Board & Batten in Spruce

LOW-MAINTENANCE IS A BEAUTIFUL THING.

Spend your weekends doing what you love, not worrying about your siding. Compared with traditional wood and cement board siding, our steel siding is durable and doesn't need costly repainting or recaulking. TruCedar siding won't melt in the sun or crack in the cold and resists moisture problems that can lead to mold, mildew and wood rot. This means you can spend more time enjoying your home and the people inside.

“WE KNEW THE IDEA WE WANTED WITH SIDING—SOMETHING SUSTAINABLE, WITH A CLASSIC EDGE AND UNIQUE. WE WANTED WARMTH WITH A MODERN TWIST. WE FOUND ALL OF THAT IN QUALITY EDGE”

— LINDSEY KERR, HOMEOWNER
FEATURED IN INHABIT MAGAZINE

FADE-RESISTANT TO LAST A LIFETIME

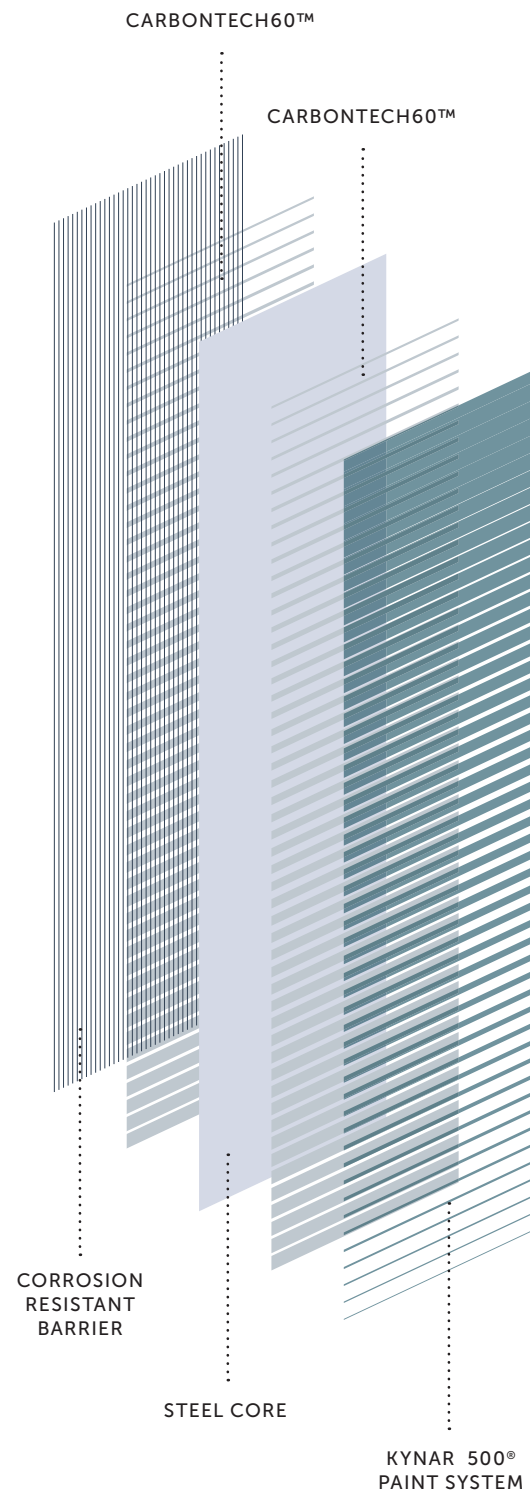

TruCedar delivers color that is rich, beautiful and durable. Colors won't fade thanks to the proprietary Kynar® PVDF Fluoropolymer coating. Kynar is superior at reflecting the hot, harmful rays of the sun to prevent fading and forms a thick film barrier that provides resistance against wear and tear.

Backed by the Best Warranty Available

Limited Lifetime Warranty includes hail, chalk and fade coverage.

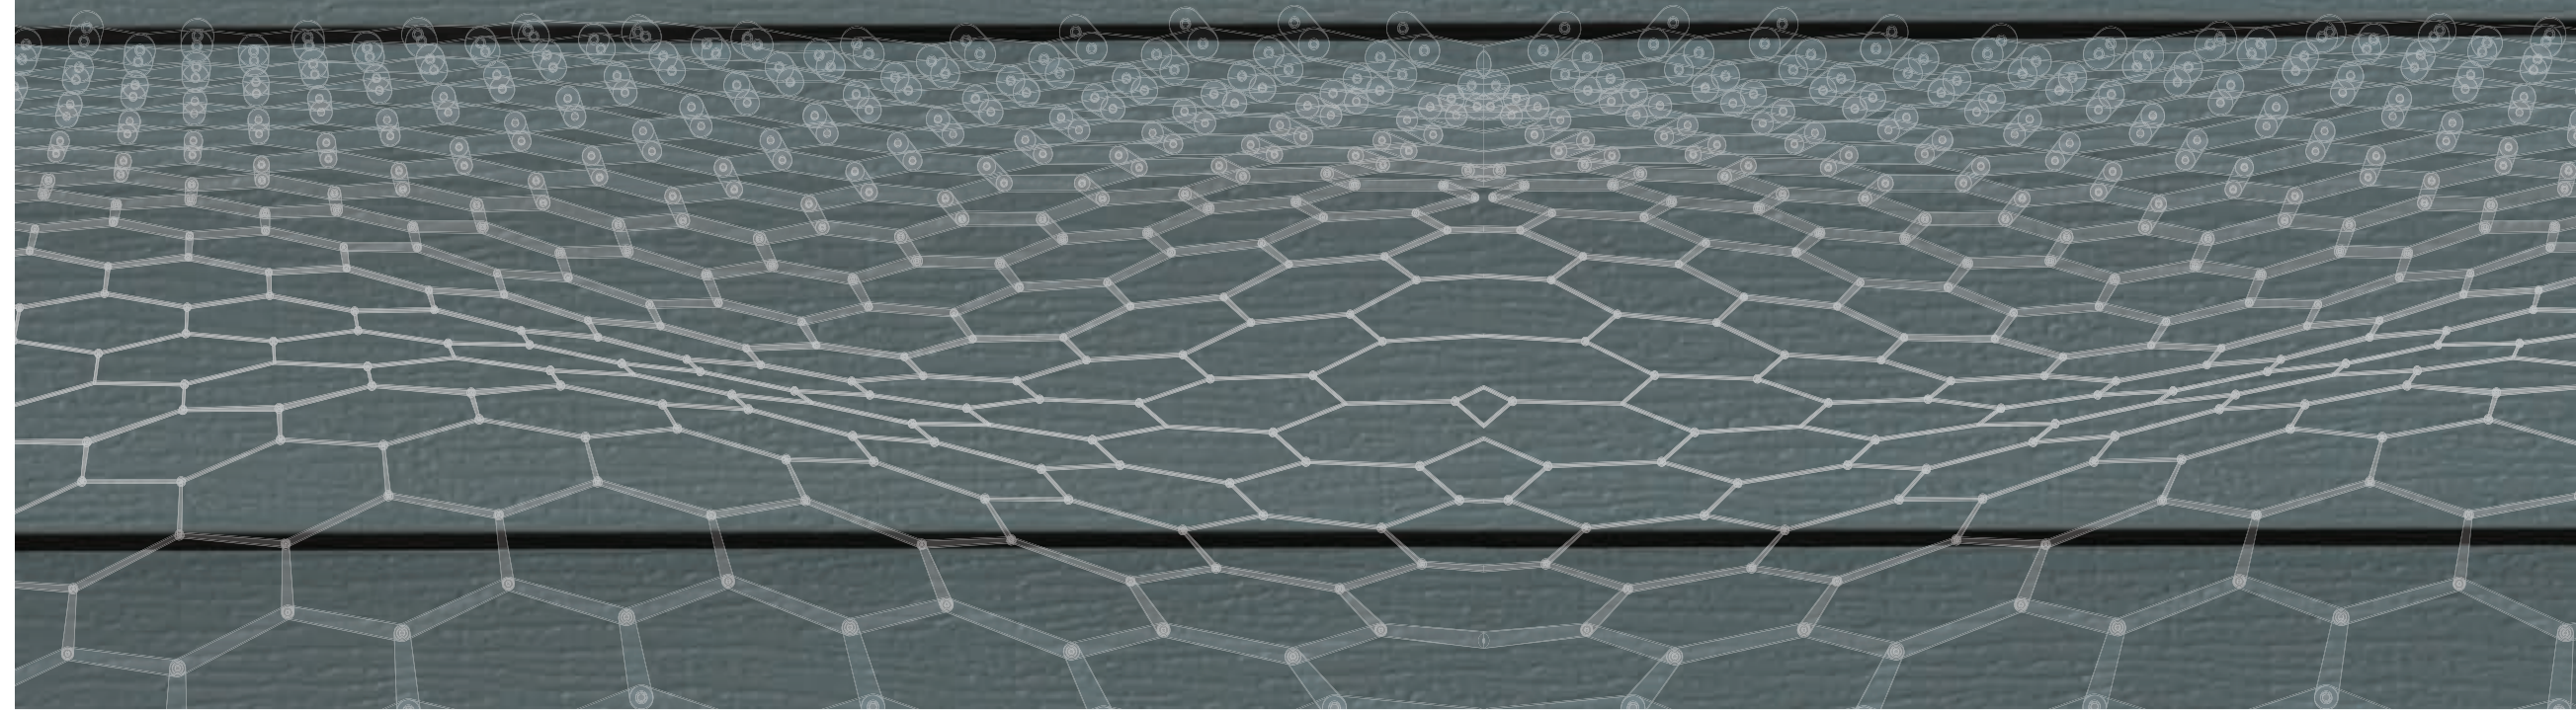

+15 YEARS

ANTICORROSIVE CARBONTECH60™ ZINC BARRIER

Every square inch of TruCedar siding is protected by CarbonTech60™, a galvanization process that applies an anticorrosive zinc barrier to an already-popular siding material that's been around for almost 100 years.

A Long History of Protection

The process of galvanization—applying a zinc coating to a steel surface—was first developed in France and England in the 1800's. The method for galvanization involved dipping steel sheets into a bath of molten zinc. This technique quickly became popular across multiple applications for its corrosion resistant properties, and has a long and proven history of providing protection for steel cores out in the elements. This same galvanization technique is used to add an extra layer of durability to TruCedar siding.

“ARCHITECTURE
SHOULD SPEAK OF
ITS TIME AND PLACE,
BUT YEARN FOR
TIMELESSNESS.”

— FRANK GEHRY

“HOMES WITH HIGH CURB
APPEAL TEND TO SELL FOR
AN AVERAGE OF 7% MORE
THAN SIMILAR HOMES.”

— REALTOR MAGAZINE

INVEST IN TOMORROW, TODAY

Curb appeal sells homes. With its strength, durability, and longevity—in addition to the lower cost of maintenance—steel siding adds to the value of your home, making it a worthwhile investment. In fact, 75% of homeowners who invest in curb appeal say they have a greater desire to be home since completing the project. (Moving.com)

Billings, MT | TruCedar Single 8" in Bennington Beige and 6" Board & Batten in Ironstone

"WITH DESIGNER SIDING—FROM HIGH DEFINITION WOODGRAINS TO RICH SOLIDS—THERE'S SURE TO BE A STEEL SIDING COLOR TO BRING YOUR PERSONAL STYLE HOME."

— THIS OLD HOUSE

ARCHITECTURALLY INSPIRED PROFILES

Don't be limited by one or two profile choices. TruCedar delivers an extensive variety of siding profile and color combinations, and blends with our Vesta profile to create a one-of-a-kind look. Whether you're remodeling or building your home, Quality Edge provides architecturally inspired design options to match your taste and vision. Choose profiles from traditional horizontal options as well as vertical Board & Batten looks to elevate your home's style. We also offer insulated siding for added protection.

West Olive, MI | TruCedar 6" & 10" Board & Batten in Fresh Canvas with Vesta 5" Plank in Aged Walnut

"MY HOUSE IS MY REFUGE,
AN EMOTIONAL PIECE OF
ARCHITECTURE, NOT A COLD
PIECE OF CONVENIENCE."

— LUIS BARRAGAN

YOU'VE GOT PROFILE OPTIONS

Choose from timeless styles and traditional embossed steel designs to complement many home styles.

Top: Single 6", Single 6" Dutch Lap
Middle: Double 4", Single 8"
Bottom: 6" Board & Batten, 10" Board & Batten

MORE COLORS. MORE POSSIBILITIES.

Designed to echo the characteristics and tones of natural wood, TruCedar Steel Siding woodgrain colors create an impactful, signature look that is as beautiful up close as it is far away. Pair TruCedar woodgrains with solid colors to naturally accentuate a range of diverse styles.

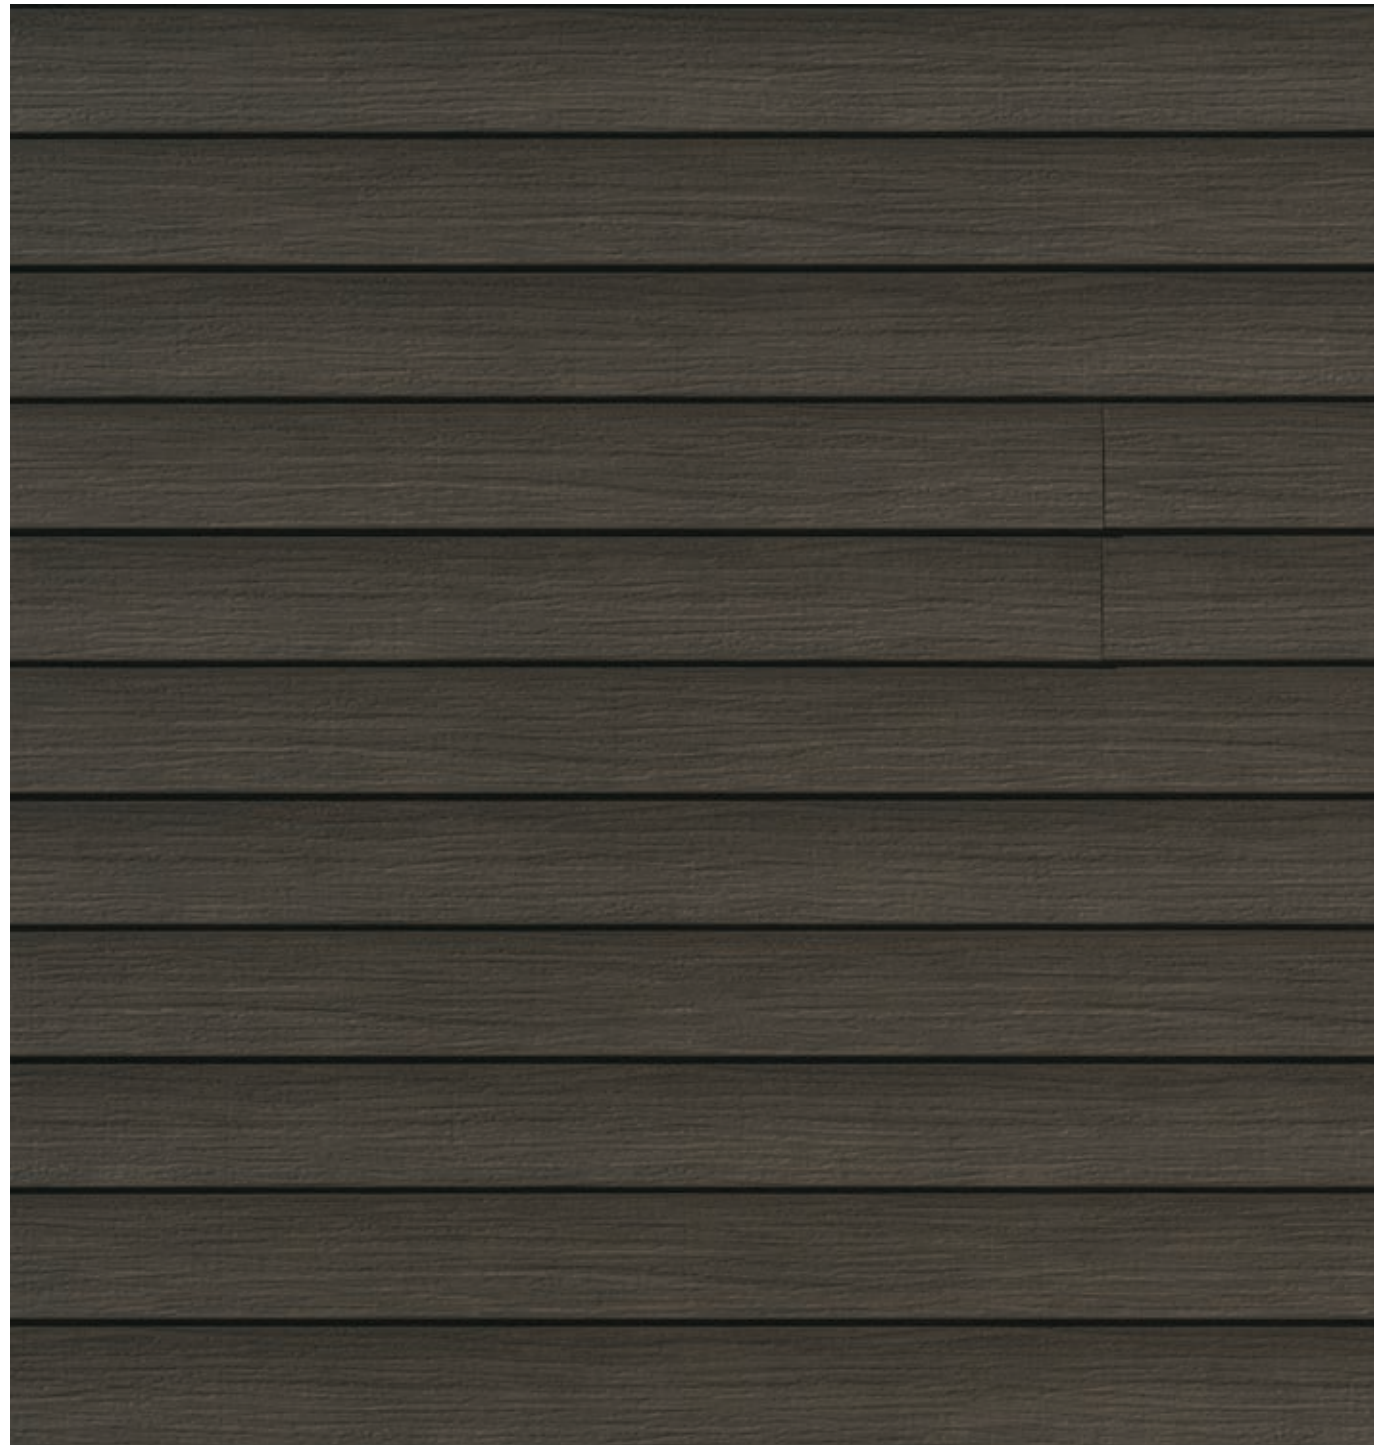

1 HD2 Woodgrains

A high definition, painted color application that captures the different tones of woodgrain details, creating a multi-dimensional and naturally accurate look that's engineered to maintain its color for a lifetime.

2 Timeless Solids

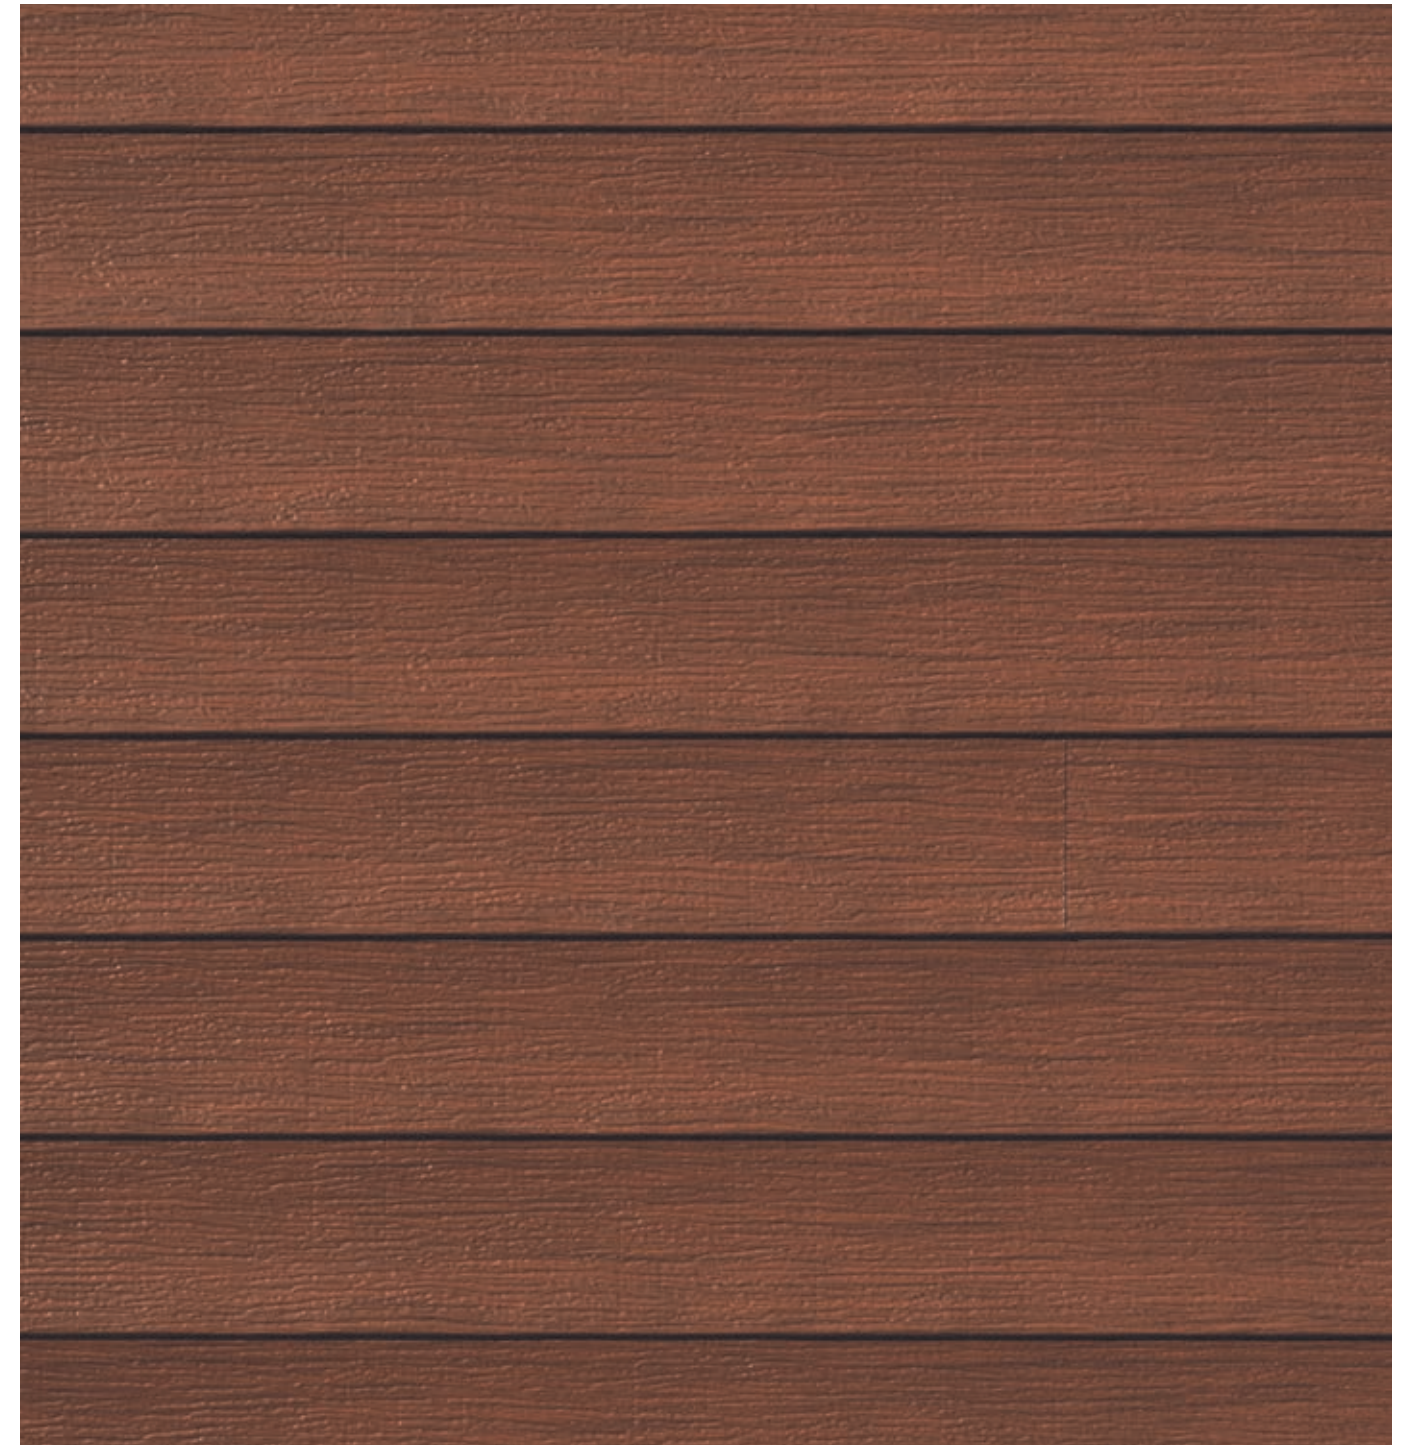

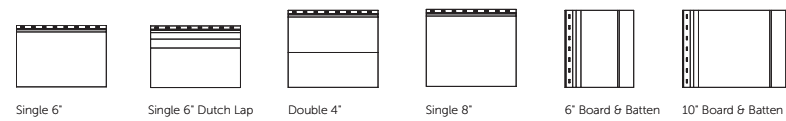

TruCedar Kynar coating protects our steel siding so well, you can choose among the boldest dark solid and purest bright neutral colors.
