BUILDING IS NOT JUST ABOUT SHELTER. IT'S ABOUT
REALIZING DREAMS, MAKING STATEMENTS, CREATING
SPACES WHERE LIFE HAPPENS.

Mary's Shell
Cleveleys, Lancashire, UK

ABOUT US

At Quality Edge, we are artisans of metal, and like the contractors who use our products, we master the age-old craft with a contemporary flair.

Our prowess lies not just in shaping metal, but also like seasoned craftsmen bending and molding with precision and grace, we transform the rigid essence of metal into fluid designs that resonate with beauty and purpose, protecting homes and adding architectural style and design. Every curve, every bend, is a testament to our commitment to excellence, yielding creations that homeowners proudly display as architectural masterpieces on their homes.

Our offerings aren't just products; they're an experience. An experience that contractors regard as a hallmark of their dedication to quality, and distributors present with pride, knowing they're showcasing the finest in metal building products. At Quality Edge, we don't merely follow the path; we carve our own, merging timeless techniques with innovative visions. With every fold and contour, we pen a narrative of dedication and passion, reminiscent of the tireless hours spent by craftsmen perfecting their skill. Delve into our world and let the tale of Quality Edge's masterful craftsmanship captivate your senses.

DESIGN+ FUNCTION

There are two key elements every home needs. DESIGN + FUNCTION. A home needs to be beautiful while also standing the test of time. Homeowners choose beauty first, then function and it's the role of contractors and builders to communicate both. That's why our team diligently focuses on creating solutions that are beautiful and inspiring, while also informative and insightful to help homeowners choose the best solution for their home. *A beautiful home is a better home.* Each solution we provide is forged in metal and fortified by our coatings to hold their beauty and performance for a lifetime.

SIDING

VESTA PLANK SIDING IN AGED WALNUT

Vesta Plank in Aged Walnut,
TruCedar 6" & 10" Board & Batten in Fresh Canvas

SIDING

Homes are so much more than meets the eye, holding the dreams and experiences of the inhabitants, surrounding them with design and comfort. A house carries a warm and nurturing feeling that's present when a homeowner buys or builds, and Quality Edge siding brings the architecture of a home to life. Precision without compromising design is extremely difficult to achieve unless you completely rethink design principles from the ground up, and that's what we've done with our Vesta and TruCedar siding. From the innovative and patented designs, customized woodgrain designs and patterns, colors that reflect those who live inside, and coatings that last a lifetime, homeowners can have peace of mind when cladding their home with Quality Edge siding.

SIDING TRENDS & INSIGHTS

Homeowners are looking for the best, long-lasting value for their siding that makes a stunning first impression.

INCORPORATING NATURAL LOOKS

Homeowners want the look of wood and natural elements without added cost and time required for maintenance.

UTILIZING BOLD, DARK SIDING

40% of home buyers are looking for a modern or contemporary style. Dark siding trends – which started three years ago – continue in every market.

CREATING CURB APPEAL

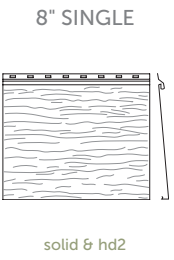

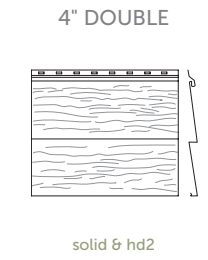

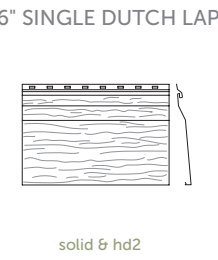

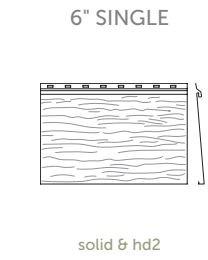

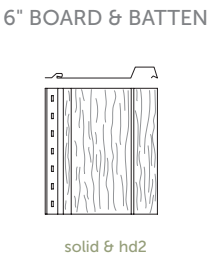

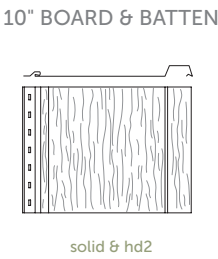

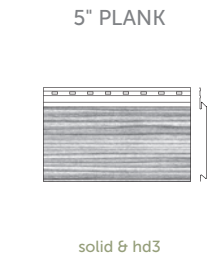

61% of homeowners prioritize curb appeal because of the impression it makes on guests and neighbors.

STEEL SIDING OFFERING

Vesta Plank in Gilded Grain

5" PLANK

With modern technology in metal coatings and a classic design construction, Vesta steel siding reinvents ship lap for the modern era. Exchanging wood decay and paint chipping that happens on real-wood siding, Vesta's zinc-coated steel core, Kynar finish, and authentic woodgrain or solid design provides an enduring residential design with a modern twist on a classic silhouette.

STEEL 0.020" | FINISHES: KYNAR® 500 CARBONTECH90 & KYNAR | HEIGHT: 6.5" | EXPOSURE: 5" | LENGTHS: 8 & 12 FT

U.S. Patent Nos.: 10,508,455; 10,760,282; 11,255,092; 11,421,423

U.K. Patent: 2,588,713

CAN Patent: 3062997C

Vesta Plank in Warm Teak

10" BOARD & BATTEN

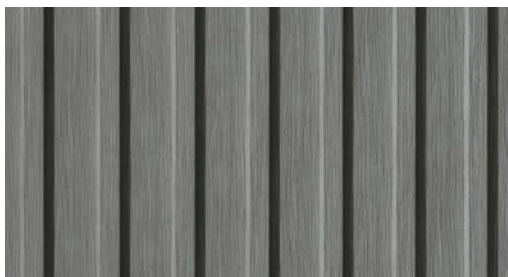

Board & Batten siding offers tight seams, designed for enhanced weather resistance without compromising the clean, polished look. Inspired by turn of the century construction, the resurgence of Board & Batten profiles provides an upgraded design for traditional or modern homes.

STEEL 0.016" | FINISHES: HD2 WOODGRAIN CARBONTECH60 & SOLID KYNAR | HEIGHT: 11.88" | EXPOSURE: 10" | LENGTH: 10 FT

TruCedar 10" Board & Batten
in Napa Vine

6" BOARD & BATTEN

Used alone or combined with the 10" Board & Batten, the 6" Board & Batten profile offers architecturally interesting designs. Built to mimic real cedar, 6" Board & Batten siding creates a tight siding fit that withstands weather like rain and snow without compromising the design or durability.

6" DUTCH LAP

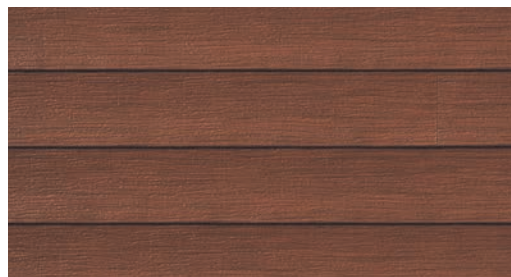

Designed to emulate the appearance of hand-carved wood siding achieved through a decorative groove at the top of each board, Dutch Lap siding adds traditional charm to any style home design. In addition to its timeless look, Dutch Lap siding is built for the elements to stand up for a lifetime without impacting the color, design, or durability.

STEEL 0.016" | FINISHES: HD2 WOODGRAIN CARBONTECH60 & SOLID KYNAR | HEIGHT: 7" | EXPOSURE: 6.13" | LENGTH: 12 FT 6 1/2"

TruCedar 6" Dutch Lap in Cedar

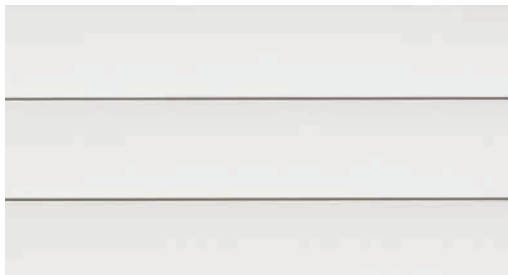

6" SINGLE LAP

Our 6" lap siding was designed with the homeowner in mind, combining durability and aesthetics, featuring a profile with an anti-corrosive and abrasive-resistant shell. Tighter seams, that won't expand and contract with temperature swings, mean your home is protected from the elements for lasting curb appeal.

8" SINGLE LAP

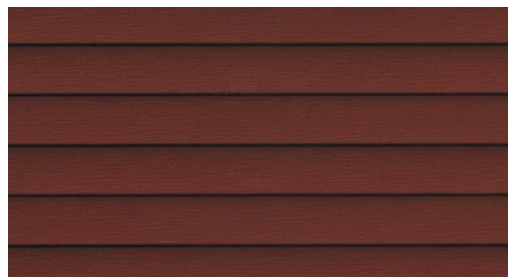

With a classic look making a comeback, the 8" lap profile combines the classic larger profile look with the modern benefits of steel siding. Built with longevity in mind, our 8" lap profile offers a high return on investment while also maintaining its top rating in environmental siding offering on the market because it's built to last a lifetime.

STEEL 0.016" | FINISHES: HD2 WOODGRAIN CARBONTECH60 & SOLID KYNAR | HEIGHT: 8.75" | EXPOSURE: 8" | LENGTH: 12 FT 6 1/2"

TruCedar 8" Single Lap & 6" Board & Batten in White

4" DOUBLE LAP

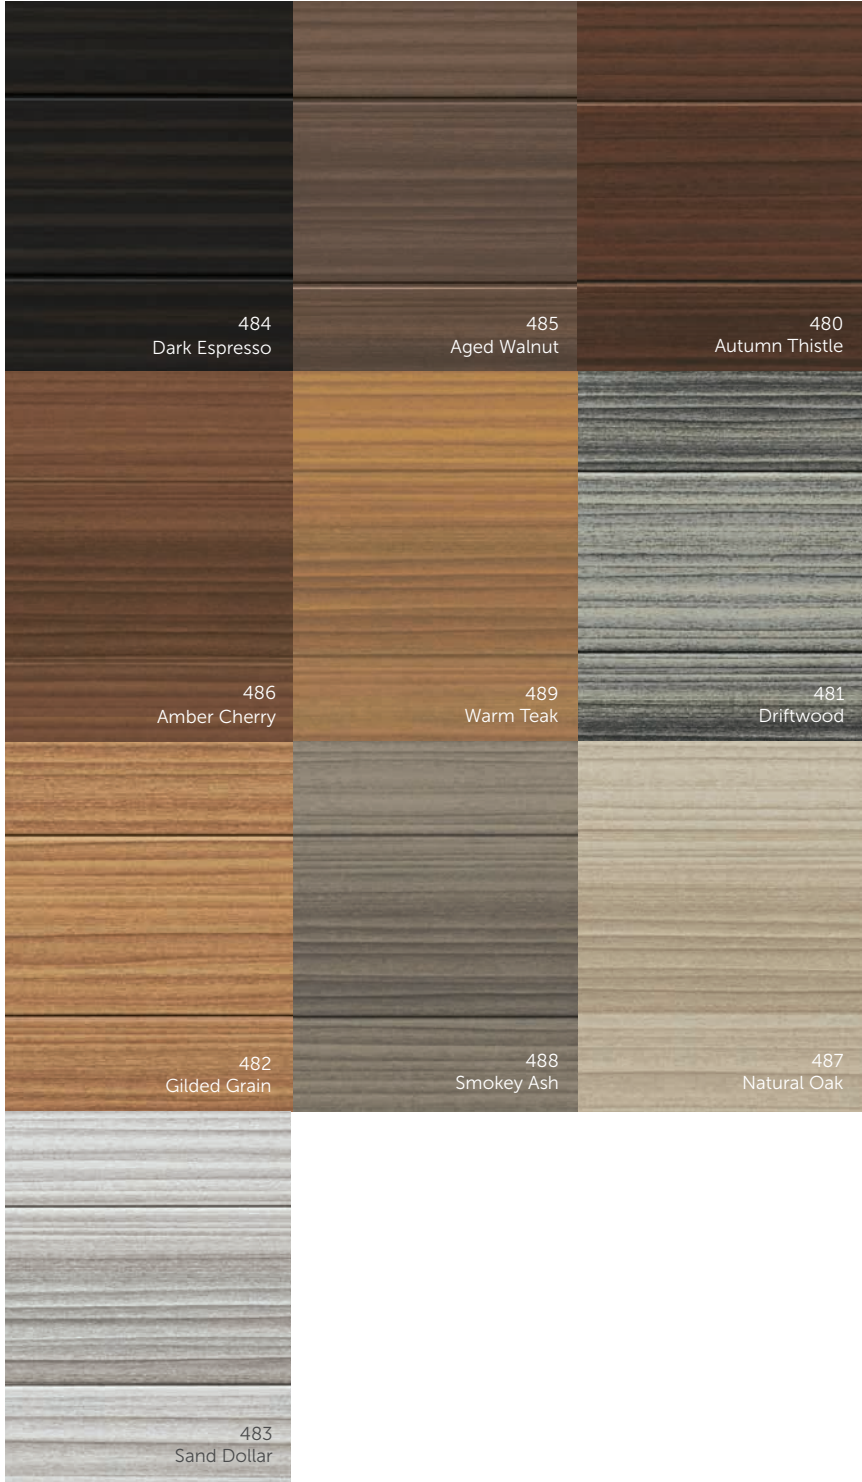

Double 4" siding stands out with its traditional horizontal profile, tight seams, and architectural look. Available in multiple woodgrain or solid colors, the Double 4" profile is an ideal choice to wrap an entire home or accent key design details with its tight look.

STEEL 0.016" | FINISHES: HD2 WOODGRAIN CARBONTECH60 & SOLID KYNAR | HEIGHT: 8.75" | EXPOSURE: 8" | LENGTH: 12 FT 6 1/2"

THE OVERHANG

VESTA VENTED SOFFIT IN NATURAL OAK

Vesta Plank in Natural Oak

OVERHANG

SOFFIT, FASCIA & DESIGNER ACCESSORIES

Throughout history soffits and overhangs have evolved, providing homes with different perspectives. Minimalist to dramatic, narrow to expansive, soffits and overhangs once minimized are making a huge comeback. With a renewed interest, comes new requests for colors, styles and profiles that not only achieve performance standards, but also make a design statement. Quality Edge soffit profiles like Vesta®, TruVent® and TruLine®, along with proper roof venting create an ecosystem in a home's attic with concealed and visible ventilation to satisfy any homeowner requirement. Because we've always thought differently about the importance of soffit, our designs set the trends for inspiration, profiles and colors draw attention to a home's overhangs to make each house a style all their own.

OVERHANG TRENDS & INSIGHTS

Because more people are spending time indoors, ventilation is one of the largest concerns for homeowners who want a healthy home.

DRAMATIC OVERHANGS

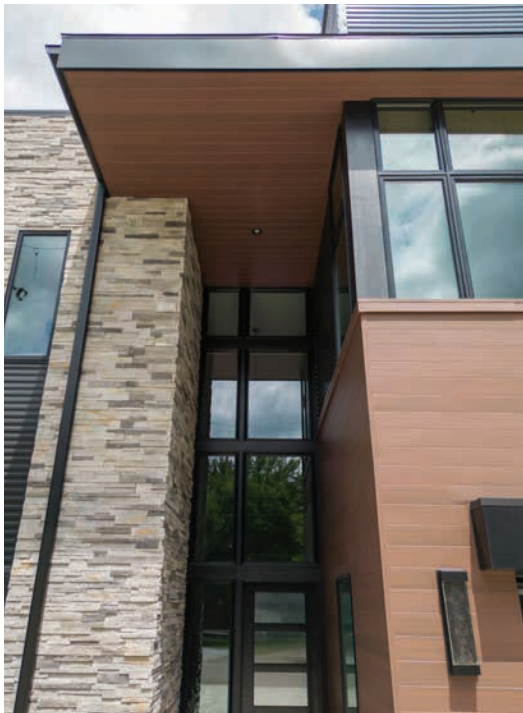

Trends in overhangs first evolved from large to small, but they're now becoming large again.

NATURAL, WOODGRAIN INSPIRATION

Homeowners are looking to embrace natural elements that call attention to their overhangs, adding style, design, and warmth.

CONSIDERED WITH SIDING

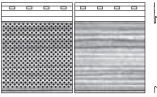

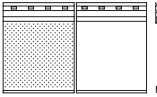

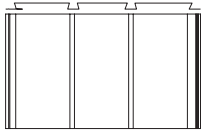

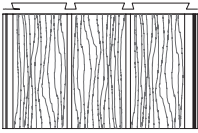

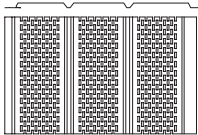

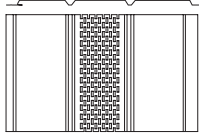

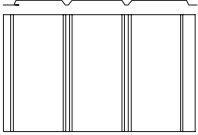

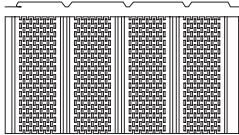

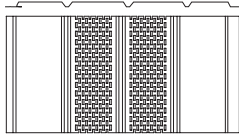

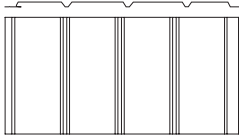

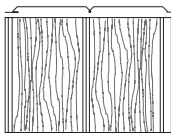

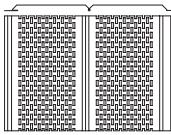

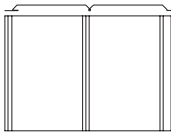

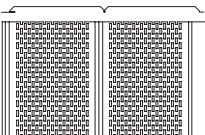

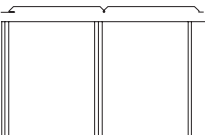

Depending on the design, homeowners choose to either match the overhang to their siding or create contrast.

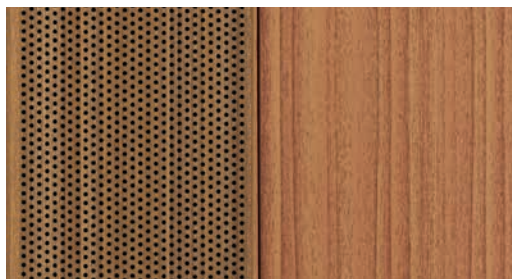

TruCedar Single 6" and 6" Board & Batten in Ironstone | Fascia, soffit and trim in White.

VESTA
5" PLANK SOFFIT

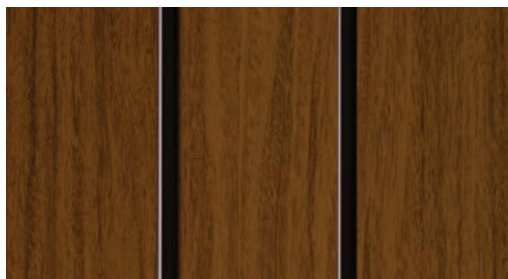

This uniquely designed woodgrain plank profile creates a natural look that not only promotes airflow efficiency but also eliminates the need for regular maintenance due to rapid deterioration that often happens with traditional wood soffits.

QualityEdge® offers a durable, low-maintenance Vesta Plank Soffit available to add elegance to any overhang.

Vesta Plank Soffit & Siding in Gilded Grain

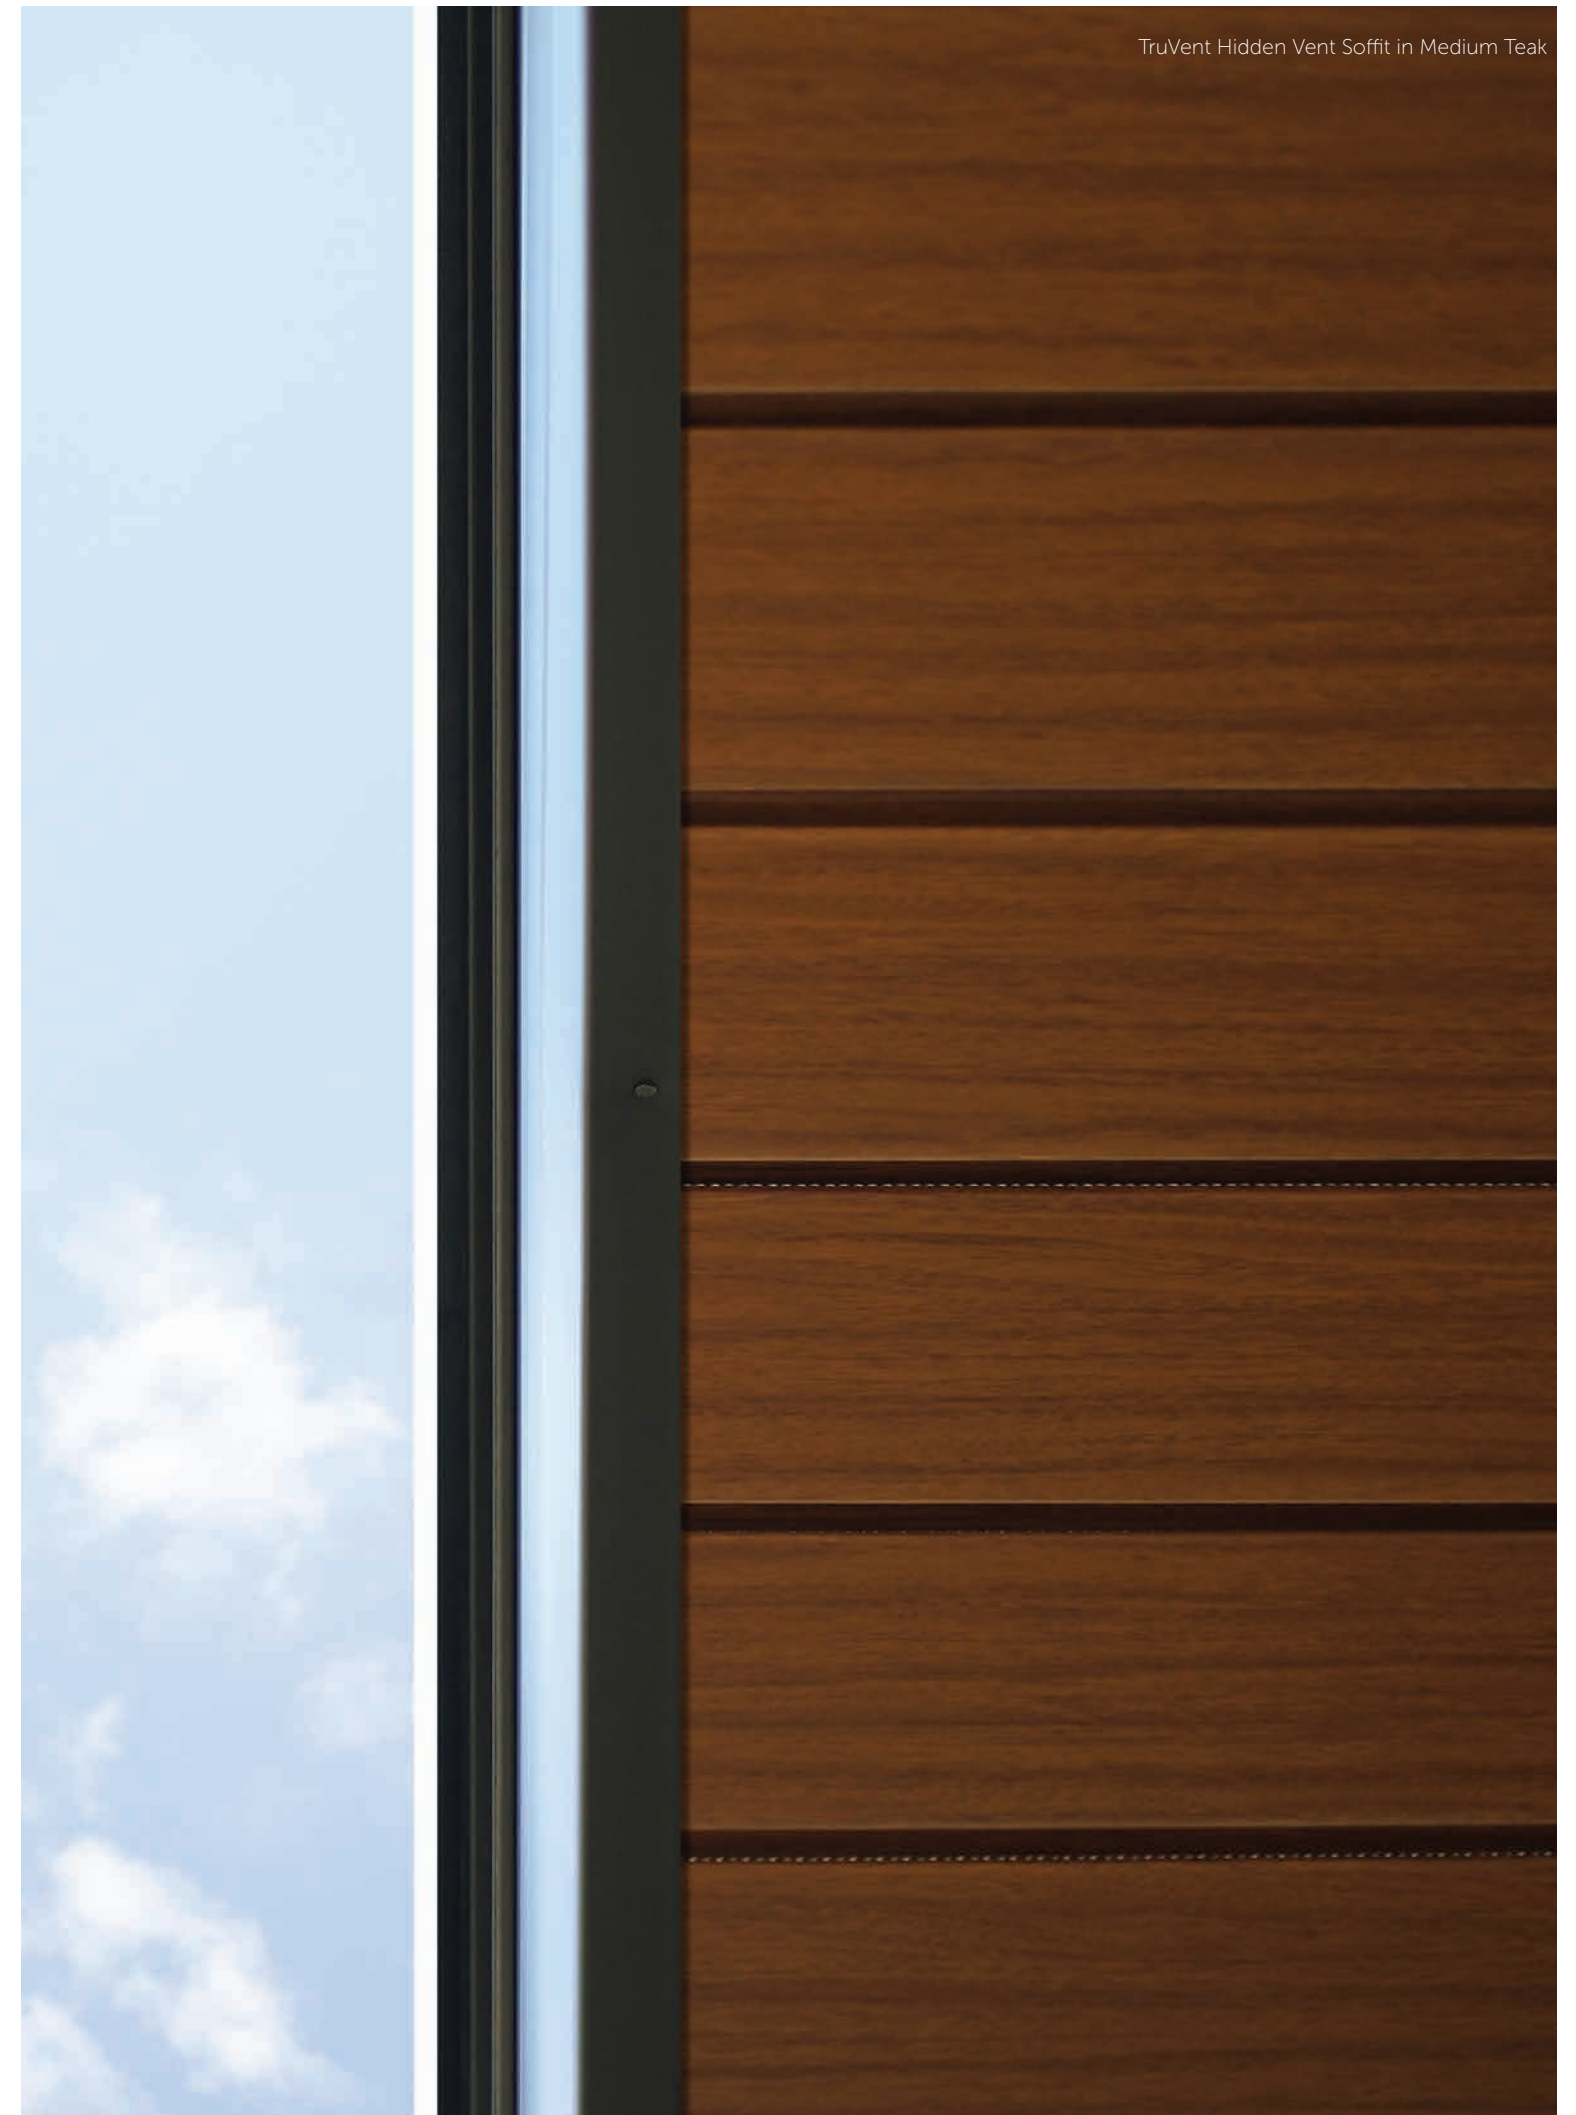

TRUVENT® WOODGRAIN HIDDEN VENT SOFFIT

Introducing the first-of-its-kind woodgrain soffit with hidden ventilation. TruVent hidden vent soffit features a patented design that conceals the ventilation, making a design statement without compromising the performance. The naturally inspired woodgrains create a stunning design statement, enhancing the overhangs and beauty of any home design.

FLASHING

INFINITY DRIP EDGE

ROOF FLASHING

When it comes to flashing a house protection comes in many forms. When done correctly, roof flashings help move water down and away from the home. The roof is one of the most important elements of any home, shielding the structure from all kinds of weather. Metal accessories placed in vulnerable areas protect the overall roof and extend its useful life. Quality Edge continues to innovate with our roofing accessories, providing patented solutions like our Infinity and Pre-Notched drip edges, designed to meet or exceed current building codes.

FLASHING TRENDS & INSIGHTS

The wrong flashing can compromise the longevity of the roof and interior structures. Choosing the right flashing doesn't only protect the roof, but can also provide a substantial architectural design.

CHOOSING THE RIGHT COLOR

Designers recommend one of three options for choosing the visible roof trim—match the siding, match the roof, or outline the roof with a neutral tone like white.

ROOFING CODES ARE BECOMING MORE STRINGENT

National building codes require a home to be properly flashed, with the drip edge overlapping a minimum of 2".

INCONSISTENCY ON-SITE

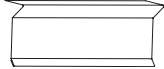

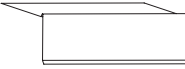

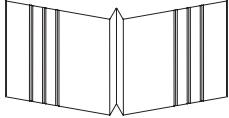

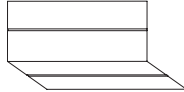

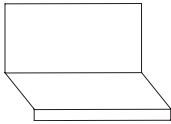

Cutting trim on the job site can easily lead to inconsistency and visual issues.

Drip Edge, Flashings & W-Valley in Terratone

SIDEWALL FLASHING

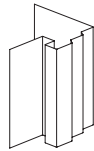

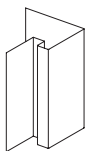

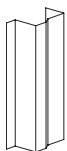

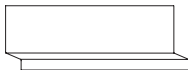

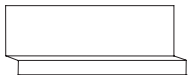

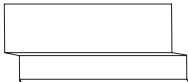

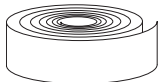

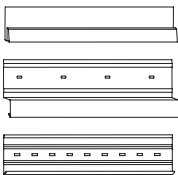

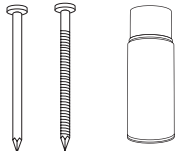

Much like being caught in a rainstorm without proper protection leaves you soaked and shivering, your home is equally susceptible to water and mold damage without correctly installed flashings around windows, doors, and roof-to-wall intersections. Sidewall flashings act as a beautiful barrier, guiding water away and protecting your home from the detrimental effects of moisture and weather. This crucial layer of defense ensures your home remains dry and secure, akin to the comfort a raincoat provides in a downpour. Quality Edge sidewall flashings offer a seamless blend of strength and aesthetics, providing limitless possibilities for achieving both professional performance and appearance in any project.

OUTDOOR
LIVING

INSIDE OUT® UNDERDECKING IN MEDIUM TEAK

Inside Out® Underdecking in Medium Teak

OUTDOOR LIVING

It's natural for us to want to be outdoors and for most of us, we're drawn to the feeling and comfort of nature, which is why homeowners continue investing in exterior environments. Homeowners look for new ways to blend the inside and outdoor spaces, bridging natural design and functional performance to create inspiring spaces. Inside Out® Underdecking from Quality Edge set out to take the need for water management to protect outdoor settings and added a sense of style and design with authentic-looking woodgrains. There's something about finding style in unexpected places and under a deck is the least likely place to find beauty unless you completely rethink what it means to create an inspiring outdoor oasis.

OUTDOOR LIVING TRENDS & INSIGHTS

Whether it's the front porch welcoming guests or under a back deck for entertaining, homeowners want thoughtful, design-driven outdoor spaces filled with interesting materials.

OUTDOOR LIVING SPACES CONTINUE EXPANDING

According to a study on outdoor living trends, 85% of experts say homeowners will devote a quarter of their home remodeling budget to their outdoor living spaces in 2023.

RETHINKING OVERALL SQUARE FOOTAGE

Designed well, outdoor spaces extend the square footage perception of a home, creating spaces like outdoor kitchens, dining areas, or living rooms.

MAXIMIZING SPACE

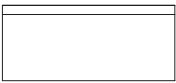

Smaller lots and building requirements are causing homeowners to think about the additional square footage of outdoor spaces differently.

GUTTER
PROTECTION
& RAINWARE

TRUGUARD® GUTTER PROTECTION

GUTTER PROTECTION & RAINWARE

Everyone wants to feel safe and protected, that warm feeling that comes over you when you know that no matter what comes your way, you'll be able to hold firm. Surprisingly, your gutters are no different. That part of your home that takes the brunt of rain, snow, ice, leaves, pine needles, branches, and the occasional animal homestead, causes gutters to be a busy place. Homeowners that choose to protect those gutters and downspouts with gutter protection find themselves sitting in their yard with a cool drink while their neighbor climbs a ladder to scoop the wet debris from the gutters. Having different options and styles to create the gutter and gutter protection combination desired, Quality Edge offers everything a homeowner would need to have a nose-forward or mesh protection to create the protection for the gutters, home, and yourself.

GUTTER PROTECTION & RAINWARE TRENDS & INSIGHTS

Gutters without guards have shorter lifespan, and low-quality solutions can lead to damage in the attic and interior spaces.

DEMAND ON THE RISE

Demand for gutter guards continues to rise by 2.5% each year as homeowners upgrade their roof or make additions on their homes.

AGING HOMEOWNERS WANT SIMPLICITY

80% of individuals 65 and older are homeowners and worry about maintenance, upkeep, and dangers in those activities.

INCREASING HOME VALUES ALWAYS TOP OF MIND

Gutter protection can add 10% to the overall value of a home, providing a minimal investment that pays off during home ownership and/or during the sale.

TRUGUARD® GUTTER PROTECTION

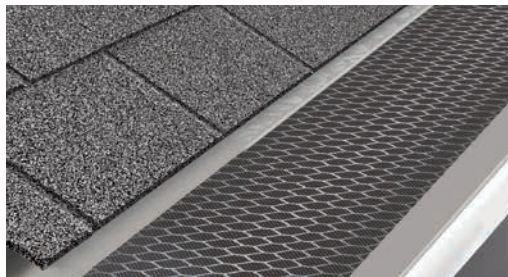

The roof directs water into the gutters. Without free-flowing gutters and downspouts, water can collect and create problems. TruGuard's patented nose-forward design means that only water can get in, keeping leaves, pine needles and debris out, assuring water flows freely from the roof to the ground.

ALUMINUM 0.024" | FINISH: KYNAR | PANEL HEIGHTS: 13.5" & 15" | PANEL LENGTHS: 5 FT

GUTTER GEKKO® GUTTER PROTECTION

Quality Edge Gutter Gekko® is professional grade gutter protection made from surgical-grade stainless steel micro-mesh, that alleviates the need for continuous gutter cleaning. This micro mesh fits on all types of roofs and interlocks panels to keep seams from unravelling, all while taking up to 60 gallons of water per minute in a given rainstorm. It also creates a defensive barricade that keeps out all sorts of minuscule debris, leaves, animal nests, pine needles and grit.

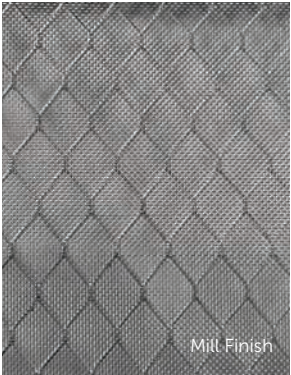

ALUMINUM 0.024" | FINISH: MILL | PANEL HEIGHTS: 5" & 6" | PANEL LENGTH: 5 FT

TRIM
COIL

TRIM COIL

Like a sculptor with a piece of marble, a seamstress with a roll of warm, rich leather, or a blacksmith with a raw piece of steel, craftsmen know they are only as good as the materials they use. Siding and roofing contractors are no different. Each home presents unique designs and challenges, often requiring a refined eye to create custom finishing elements on-site that look and fits that one-of-a-kind home. Not all materials are the same. Forged from different properties and techniques, the firmness and hold of Quality Edge trim coil once formed at a job site will achieve firm, tight corners and angles that match or contrast the home's siding to finish the overall look.

TRIM COIL TRENDS & INSIGHTS

Whether half-hard or full-hard temper, trim coil offers multiple levels of performance for a firmer or fluid forming of metal that holds its shape. Multiple paint layers also drive protection and performance.

THE SEARCH FOR EXACT MATCHES

In the past, contractors often had to settle for "close enough." Today, the right coil can perfectly match and complete the look of any home's siding.

DARK ACCENTS DRAW OUT DETAILS

Whether wrapping windows or doors, the trends of prior decades to mute these architectural details is being replaced by dark colors that create a more modern feel.

Quality Edge delivers standard colors and can match the most popular siding brands.
