

HARNESS THE AIR

QUALITY EDGE SOFFIT

There are two key elements that every house needs to be a home, **DESIGN** + **FUNCTION**. Your home needs to be *beautiful* while also standing the tests of mother nature & time.

At Quality Edge we start with thinking about design – finding a way to hide the ugly holes – allowing your overhangs to make a statement.

A BEAUTIFUL HOME IS A BETTER HOME. Each design is supported with the highest function because A BALANCED HOME IS A BETTER HOME. Resulting in a home that is beautifully balanced.

According to Air Advice

According to Lawrence Berkley Laboratory

9 out of 10 American homes are breathing unhealthy indoor air. Over 91% of homes tested show elevated particle allergen levels. Poorly ventilated homes have been reported to be one of the leading causes of moisture build up, mold, mildew and rot in attics.

MAKE A STATEMENT

Overhangs continue trending from minimal to dramatic eaves, with homeowners achieving an architectural statement for their home.

COMPLEMENT YOUR HOME

Soffit eaves, once expansive to provide shade and protection, are making a comeback with extended soffits and porches.

CREATE AN ACCENT

With the investment in overhangs, homeowners are incorporating woodgrain colors and bold, rich solid colors to complete the look.

MOISTURE IS THE ENEMY OF ALL HOMES

and without proper ventilation could lead to catastrophic consequences.

NOT BALANCED

WOOD ROT

Moisture attaches itself to a home's wood framing, weakening the integrity of the materials, costing thousands.

SOLID STRUCTURE

With proper ventilation, the wood substructures of a home maintain their strength and longevity.

MOLDY AIR

Air with mold and mildew spores can cause catastrophic health concerns like asthma and cancerous risks.

CLEAN AIR

BALANCED

Proper indoor air quality in a home protects the

INSULATION FAILURE

Wet insulation reduces the effectiveness and integrity of insulation driving higher heating and cooling costs.

LOWER ENERGY COSTS

Homes with effective ventilation reduces heating and cooling costs throughout every type of climate.

Vesta Plank Soffit & Siding in Gilded Grain

TruVent Hidden Vent Soffit in White

Vesta Plank Soffit in Gilded Grain

VESTA 5" PLANK SOFFIT

This uniquely designed woodgrain plank profile creates a natural look that not only promotes airflow efficiency but also eliminates the need for regular maintenance due to rapid deterioration that often happens with traditional wood soffits.

Quality Edge® offers a durable, low-maintenance Vesta Plank Soffit available to add elegance to any overhang.

STEEL 0.020" | FINISHES: KYNAR® 500 CARBONTECH90 & KYNAR | HEIGHT: 6.5" | EXPOSURE: 5" | LENGTHS: 8 & 12 FT | NFA: 11.4 PER PANEL

TRUVENT® WOODGRAIN HIDDEN VENT SOFFIT

Introducing the first-of-its-kind woodgrain soffit with hidden ventilation. TruVent hidden vent soffit features a patented design that conceals the ventilation, making a design statement without compromising the performance. The naturally inspired woodgrains create a stunning design statement, enhancing the overhangs and beauty of any home design.

ALUMINUM 0.019" | FINISH: Q800 TUFFTECH™ | HEIGHT: 12" | LENGTH: 12 FT | NFA: 11.0

TRUVENT® HIDDEN VENT SOFFIT

Engineered without compromise, TruVent® Hidden Vent Soffit, with it's patented design, gives you premium style without sacrificing performance.

The carefully designed aluminum soffit offers the ideal strength-to-weight ratio, creating the crisp, clean design of the angled vent system. The result is beautiful—and a breeze to install.

ALUMINUM 0.019" | FINISH: Q800 TUFFTECH™ | HEIGHT: 12" | LENGTH: 12 FT | NFA: 11.0

TRULINE® PERFORMANCE DRIVEN SOFFIT

Engineered for ultimate ventilation, TruLine is a performance-driven soffit designed to maximize the amount of airflow with a wide range of ventilation options. Developed using our exclusive boundary-pushing performance process, TruLine is one of the most effective soffits available on the market.
